

LX IN BEIGE LEATHER

Steering Wheel Controls

Keep your eyes on the road and your hands on the wheel with the GLS and LX's steering-wheel-mounted audio controls. All models also feature steering-wheel-mounted cruise control.

Automatic Temperature Control

Sonata LX's fully automatic system with air quality system (AQS) monitors inside cabin temperature and air quality and makes adjustments as needed to maintain optimal comfort.

Audio Systems

For great music, all models come with an AM/FM/CD/MP3 audio system with six speakers. The LX offers an optional 6-disc in-dash CD changer with subwoofer and external amplifier.

Heated Front Seats

A very welcome feature on frosty mornings or chilly evenings, the Sonata LX's heated front seats are a comfortable luxury you can enjoy anytime at the touch of a button.

The Sonata's well-appointed interior gives you plenty of room to get comfortable, with interior volume classified by the U.S. EPA as a "Large Car," a full class above Toyota Camry and Honda Accord. Yet with all that space, you'll find its ergonomically designed cabin with intelligent placement of driver controls puts everything within easy reach—making every ride all the more pleasant.
