

GT IN ELECTRIC RED AND SE IN SUNBURST YELLOW

The more in tune you are with your vehicle, the more pleasure you'll get from your driving experience. To keep you well-informed, the trip computer on V6 models calculates range, average speed and drive-time information, and includes a trip odometer. The SE's exclusive center multi-gauge display unit is equally forthcoming, keeping you up to speed on torque, fuel consumption and voltage. Proving once again that in every good relationship, communication is key.
